## Speed App Development and Delivery with Cloud Automation

Torque is a SaaS platform for delivering Infrastructure Automation at Scale for complex application-centric environments on cloud technologies including AWS, Azure, and Kubernetes. IT leaders and DevOps innovators around the world trust Quali to enable self-service automation and governance to streamline application development, testing, and release to production.

NO BOTTLENECKS • PRODUCTIVITY

SELF-SERVICE

FULL GUARDRAILS • RISK & COST PROTECTION

AUTOMATION & ORCHESTRATION

GOVERNANCE & COST CONTROL

FULL AUTOMATION • TIME TO MARKET

BENEFITS

SELF–SERVICE

Speed time to market with out-of-the-box support to CI/CD pipelines to deploy a common environment definition from Dev to Production

AUTOMATE & ORCHESTRATE

Quickly model application-centric templates aligned to business needs

GOVERNANCE

Manage AWS and Azure cloud resources efficiently with application-centric cost tracking

SCALABLE INFRASTRUCTURE AUTOMATION

Single Pane of Glass for Mixed Cloud

FEATURES

SELF–SERVICE ENVIRONMENTS
Enable your developers and other users to access the cloud infrastructure & application environments they need, on demand- using the power of Environments as a service (EaaS) - through a GUI portal, your CI/CD tools, and a CLI
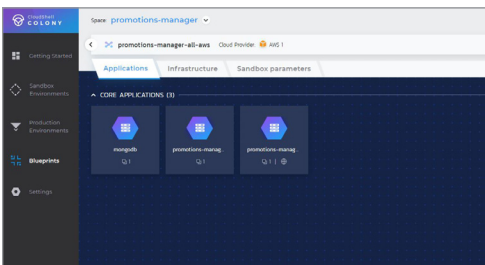

MANAGE CLOUD COSTS
Eliminate uncertainty and avoid over-spending in your cloud accounts with the ability to automatically tag and de-commission resources, embed policy management, and provide Role Based Access Control to resources
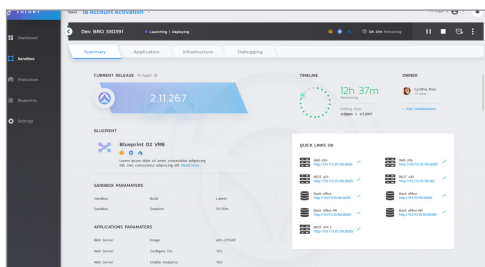

SEAMLESS CI/CD INTEGRATION
Natively integrate into your organization's DevOps ecosystem and CI/CD pipeline to support continuous environments

SIMPLE BLUEPRINT MODELING
Build reusable environment templates on AWS, Azure, and Kubernetes using sourced controlled YAMLs or a user-friendly UI and Torque's open framework to connect the tools you're already using to automate the set-up and tear-down of complex application-centric environments in a repeatable, reliable manner.

FRICTIONLESS GOVERNANCE
Ensure company compliance is maintained and enforced with polices that control usage, security, costs, and prevent sprawl without adding speed-killing friction to developement and innovation cycles.
